Tony and Carolyn

Tony is 60-year American who dropped out of school at 15. After years of living with the fear of being "discovered" as a non-reader, Tony sought help from LVSSC. The stress of trying to write reports at his gate guard job and the fear of losing his job was affecting his health. As a result of Tony's sessions with his tutor, Carolyn, he was able to write reports with new confidence, find a new job, and write a letter to his daughter on her birthday for the first time.
